PREFACE

The Annual Report of the Trade of Canada for 1942 is published in three Volumes. Volume I contains summary and historical tables as well as tables showing Canadian external trade with each country by principal commodities. Volume II is a record in detail of Canadian exports by commodities and countries. Volume III is a record in detail of Canadian imports by commodities and countries.

There has been little change in the format of these Volumes as compared with the previous year, although in Volume I, there have been some changes made in the numbering of the tables and some re-arrangement of material.

The Report was compiled in the External Trade Branch of the Bureau under the direction of Mr. L. A. Kane, Chief.

S. A. CUDMORE,
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,
OTTAWA, September 1, 1943.

PRÉFACE

Le Rapport Annuel du Commerce du Canada en 1942 paraît en trois volumes. Le volume I contient un résumé et des tableaux historiques ainsi que des tables indiquant le commerce extérieur canadien avec chaque pays, par articles principaux. Le volume II est un relevé détaillé des exportations canadiennes par articles et pays. Le volume III donne en détail, par articles et pays, les importations canadiennes.

Le format de ces volumes a peu changé comparativement à celui de l'année précédente, bien qu'au volume I, le numérotage des tableaux ait été modifié et la matière disposée autrement.

Le rapport a été compilé à la Branche du Commerce Extérieur du Bureau, sous la direction de M. L. A. Kane, Chef.

S. A. CUDMORE,
Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,
OTTAWA, le 1er septembre 1943.

EXPLANATORY NOTES

1. In all the tables of imports and exports in this Report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Washing machines and parts" and "Internal combustion engines and parts", etc., etc., which show both quantities and values. In the item "Washing machines and parts" the quantity represents the number of "Complete washing machines" only, while the value represents not only the value of the specified number of complete washing machines but also the value of all kinds of "Parts" of washing machines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. Under the main provisions of the law, the value of merchandise imported into Canada is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to Canada; but the value shall not be less than the price to jobbers and wholesalers generally, nor less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (See Sections 35 to 45 of the Customs Act.)

7. For Customs entry purposes, the value of the imports, which is in the currency of the country from which goods are imported, is converted to Canadian dollars at authorized exchange ratios. (See Section 55 of the Customs Act and Orders in Council respecting currency valuations.)

8. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

9. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

10. "Exports of Foreign Produce" consist of "Imports entered for Consumption" (see no. 5 above), which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

11. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

12. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from Canada are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.

13. *Ports*.—The Table of the Trade of Canada, by Ports and Provinces, shows that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for home consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

14. The initials "N.O.P." mean "not otherwise provided for".

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation), subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, récipients, etc. n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression «ton» signifie 2,000 livres et «cwt.» (ou quintal) 100 livres avoirdupois. Lorsqu'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

4. Dans ce rapport on trouve des item comme «lessiveuses et pièces» et «moteurs à combustion interne et leurs pièces de rechange», etc., etc., montrant les quantités et les valeurs. Dans le cas de «lessiveuses et pièces» la quantité représente le nombre de «lessiveuses complètes» seulement, et la valeur représente non seulement celle des lessiveuses complètes mais aussi celle de toutes les «parties» ou «pièces» de lessiveuses; c'est pourquoi, dans cet item et autres semblables, il est impossible d'établir la valeur moyenne par unité.

5. «Importations» signifie «importations entrées pour la consommation». «Entrées pour la consommation» n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie imposable de ces marchandises.

6. Dans l'esprit de la loi, la valeur des marchandises importées au Canada est leur valeur raisonnable au prix courant là où elles sont vendues pour la consommation locale sur les principaux marchés du pays d'où, à la même époque, elles sont expédiées directement au Canada; mais la valeur ne doit pas être inférieure au prix coté généralement aux marchands de gros, ni inférieure au coût réel de production à la date de l'expédition, plus une marge raisonnable pour frais de vente et profits. (Voir articles 35 à 45 de la loi des douanes.)

7. Pour les entrées des Douanes, la valeur des importations, exprimée en monnaie du pays d'où les marchandises proviennent, est convertie en dollars canadiens au taux autorisé du change. (Voir article 55 de la loi des douanes et ordres en conseil sur l'évaluation des devises étrangères.)

8. Les «exportations de produits canadiens» comprennent non seulement les articles d'origine purement canadienne, mais aussi les articles importés d'origine étrangère qui ont été modifiés dans leur forme ou augmentés en valeur par une plus ample transformation au Canada, comme le sucre raffiné après avoir été importé à l'état brut, les articles fabriqués avec du caoutchouc brut importé.

9. La valeur des «exportations de produits canadiens» est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais.

10. Les «exportations de produits étrangers» comprennent les «importations entrées pour la consommation» (voir le n° 5 ci-dessus) qui ont été exportées du Canada dans le même état qu'à leur entrée. La valeur est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais, quand les marchandises sont exportées du Canada.

11. Les importations au Canada sont attribuées aux pays d'où elles ont été consignées au Canada. Les pays de consignment sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inévitables. Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignment. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent ces importations comme venant du Royaume-Uni.

12. Les exportations du Canada sont attribuées au pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays de consignment est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inévitables.

13. *Ports*.—Le tableau du commerce du Canada, par port et province, montre les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation de la province où est situé le port, ou que les marchandises exportées sont produites par la province où est situé le port de sortie.

14. Les initiales «n.a.é.» signifient «non autrement énuméré».

GOLD IN CANADIAN TRADE STATISTICS

The publication of statistics showing the gross imports and exports of gold has been temporarily suspended as from September, 1939. Statistics for periods prior to this time have been accordingly revised to exclude all gold formerly included in the total of merchandise exports.

Statistics showing the net exports of non-monetary gold, including changes in stocks held under earmark, are published as a supplement to the trade figures, and are given below.

Exports of gold in Canadian trade statistics were distinguished in previous reports as between monetary and non-monetary. Monetary gold exports were described as those which entailed a reduction in the Dominion's monetary gold stocks. All other gold exported (classed as non-monetary) were shown as merchandise, and included with the total merchandise exports.

The fact that gold is a money metal gives it peculiar attributes which distinguish it from other commodities in trade. In particular, the movement of gold in international trade is determined almost exclusively by monetary factors. The amount of exports may fluctuate widely from month to month owing to other than ordinary trade or commercial considerations. In addition, gold is generally acceptable. It does not have to surmount tariff barriers and is normally assured a market at a relatively fixed price. For these reasons, provision was made in previous trade reports for a supplementary table showing exports from Canada excluding all gold.

It is further to be noted that gold does not move in international trade in any direct or normal relation to sales and purchases. It may be bought or sold abroad without moving in or out across the frontier, the sales or purchases in such cases being recognized by simply setting aside or "earmarking" the gold in the vaults of the central bank. Trade statistics deal only with physical movements, sales or purchases of gold which do not involve an actual movement being more properly regarded as an "invisible item" and taken care of in the "International Balance of Payments" statements. Changes in the Bank of Canada's stock of gold under earmark do not enter, therefore, into the trade statistics.

L'OR DANS LES STATISTIQUES DU COMMERCE CANADIEN

La publication des statistiques relatives aux importations et exportations brutes d'or a été temporairement suspendue depuis septembre 1939. Les statistiques pour les périodes antérieures à cette date ont été révisées en conséquence, de manière à exclure tout l'or qui entraînait auparavant dans le total des exportations de marchandises.

Les statistiques montrant les exportations nettes d'or non monétaire, y compris les changements dans les stocks affectés, sont publiées comme supplément aux chiffres sur le commerce et sont données ci-dessous.

Dans les rapports précédents les exportations d'or dans les statistiques du commerce canadien comprenaient l'or monétaire et l'or non monétaire. Les exportations d'or monétaire y étaient décrites comme celles qui entraînent une diminution des stocks d'or monétaire du Dominion. Toutes les autres exportations d'or (classifié comme non monétaire) étaient regardées comme marchandises et comprises dans les exportations globales de marchandises.

Le fait que l'or est un métal-monnaie lui donne des attributs spéciaux qui le distinguent des autres denrées dans le commerce. En particulier le mouvement de l'or dans le commerce international est déterminé presque exclusivement par des facteurs monétaires. Le volume des exportations peut largement fluctuer d'un mois à l'autre à cause de considérations autres que celles de l'échange et du commerce ordinaires. En outre, l'or est généralement acceptable. Il n'a pas à surmonter les barrières tarifaires, et un marché lui est normalement assuré à un prix relativement fixe. Pour ces raisons les rapports antérieurs sur le commerce fournissaient un tableau supplémentaire sur les exportations canadiennes, à l'exclusion de l'or.

De plus, il faut observer que dans le commerce international l'or ne se déplace pas en relation directe ou normale avec les ventes et les achats. Il peut s'acheter ou se vendre à l'étranger sans entrée ou sortie à la frontière; en ces cas, les ventes ou les achats sont reconnus en mettant simplement de côté ou en «affectant» l'or dans les chambres fortes de la banque centrale. Les statistiques du commerce n'ont trait qu'aux mouvements physiques; les ventes et les achats d'or qui ne comportent pas un mouvement réel sont plus proprement regardés comme un «item invisible», et ils prennent place dans les états de la «Balance des paiements internationaux». Les changements dans les stocks d'or affecté de la Banque du Canada ne paraissent donc pas dans les statistiques du commerce.

* In this classification the expression "Canadian Farm Products" refers, in the case of Exports, to commodities actually produced in their original form on Canadian farms. In the case of Imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both Imports and Exports, materials or commodities such as Canada does not produce, e.g.—cane sugar, tea, rubber, cotton, silk, etc.

COMPARISON OF THE VALUE AND VOLUME OF IMPORTS AND EXPORTS

Changes in the value of foreign trade may be caused by variations in the quantity or volume of goods imported or exported, by fluctuations in price, or by a combination of these factors. If prices should happen to fall between two given dates when the aggregate nominal values of imports and exports decline, or if they should happen to rise when the aggregate nominal values increase, it is clearly possible that there may be no corresponding decline or increase in the amounts of goods imported or exported. Quantities may even increase when nominal values decline, or may fall off when nominal values rise. It is necessary, therefore, in comparing the physical volume of imports and exports at different periods, to make allowance for fluctuations in prices. The table on the following page presents a comparison of the physical volume of imports and exports, with the nominal or declared values.

The indexes of value and volume have been re-calculated on a five-year base (1935-1939 = 100) making them uniform in respect of base period with the other indexes of the Bureau.

To eliminate the factor of price changes and show the variations in the volume of imports and exports over the period, average values were ascertained for a base year in respect to each item imported or exported for which statistics of quantity as well as value were available, and the quantities for the same items in each year were revalued at the average values of the base year. In the case of a number of items, such as certain textile products, books and printed matter, machinery, automobile parts, toys and many miscellaneous goods for which quantities are not available, and other items for which quantities are available, but which have been rendered incomparable for the period under review by changes in tariff schedules and statistical classification, it was assumed that the value moved proportionately in the same direction, as in the case of related commodities. In other cases, even where the quantities are given, the items are so small in amount that they have been merged with the items for which quantities are not given at the end of each sub-group. The values of the miscellaneous classes at the end of each main group, e.g., "Other Agricultural and Vegetable Products", "Other Fibres and Textiles", etc., are assumed to have moved in harmony with the average of the rest of the entire group to which they refer, or in the case of "Other Miscellaneous Commodities", in proportion to the average of the preceding eight groups. The assumption that the unspecified items move in harmony with the groups to which they are attached may not always be valid and the results must not be regarded as of great precision, but since the value of goods for which quantity statistics are not available and those not comparable over a short period is small in comparison to the total trade, the amount of error introduced on their account is not considerable when the interval from the base year is not long.

As the time interval from a given base year increases, the comparison tends to lose its significance. New items may be added to the classification that have no counterpart in the base year, the relative importance of old items may vary, and others may vary considerably in kind or quality but not in name, or a change in the method of collecting and recording the statistics may materially alter the results of the revaluation.

COMPARAISON ENTRE LA VALEUR ET LE VOLUME DES IMPORTATIONS ET EXPORTATIONS

Les changements en valeur du commerce étranger peuvent être causés par les fluctuations du volume des marchandises importées ou exportées, par les variations des prix ou encore par ces deux facteurs combinés. S'il arrive, par exemple, que les prix baissent entre deux dates spécifiées lors d'une période accusant un fléchissement de la valeur globale des importations et exportations, ou bien qu'ils montent lorsqu'on enregistre un accroissement de la valeur globale, il ne s'ensuit pas nécessairement que le volume des importations et exportations doive subir de diminution ou d'augmentation correspondantes. Il peut même arriver que le volume augmente lorsque la valeur nominale baisse et qu'il baisse lorsque celle-ci augmente. Il faut donc tenir compte des fluctuations des prix lorsqu'il s'agit d'établir une comparaison entre le volume physique des importations et celui des exportations entre deux périodes. Le tableau qui suit donne une comparaison du volume effectif des importations et exportations juxtaposé aux valeurs nominales ou déclarées.

Les indices de valeur et de volume ont été recalculés sur une base de cinq ans (1935-1939=100) de façon à les rendre conformes, en ce qui concerne la période fondamentale, aux autres indices du Bureau.

Afin d'éliminer le facteur de la fluctuation des prix et de donner les variations en volume des importations et exportations au cours de cette période, on a calculé les valeurs moyennes pour une année de base de chaque article importé ou exporté sur lequel on disposait de données statistiques, tant en volume qu'en valeur, et révalué le volume des mêmes articles pour chacune des autres années aux valeurs moyennes de l'année de base. En ce qui concerne quelques articles, comme par exemple certains textiles, les livres et les imprimés, les machines, les pièces de rechange d'automobile, les jouets et bon nombre de divers articles sur lesquels on ne possède aucune donnée en volume, ainsi que certains autres articles dont le volume, bien que connu, ne se prête pas toutefois à des comparaisons pour la période qui nous intéresse à cause des modifications apportées aux cédules tarifaires et aux classifications statistiques, on s'est guidé sur l'hypothèse que ces valeurs ont suivi proportionnellement les mêmes tendances que celles des produits connexes. Dans d'autres cas, même où l'on dispose de la quantité, les chiffres sont si faibles qu'on les a inclus avec les autres entrées qui ne sont pas spécifiées nommément à la fin de chaque sous-groupe. Quant aux valeurs des groupes divers paraissant à la fin de chaque groupe principal, comme par exemple «autres produits agricoles et substances végétales», «autres fibres et textiles», etc., on présume qu'elles ont suivi les mêmes tendances que la moyenne du groupe entier sous lequel ils sont classifiés, ou bien, en ce qui concerne la classification «autres denrées diverses», qu'elles ont eu les mêmes tendances que la moyenne des huit groupes précédents. L'hypothèse que les articles non spécifiés suivent les mêmes tendances que les groupes dont ils font partie n'est sans doute pas toujours juste, les données ne pouvant ainsi être considérées comme des plus précises; mais comme la valeur des produits dont on ignore le volume, ou ceux qui ne se prêtent pas à des comparaisons pour un court laps de temps, n'est que minime comparativement au commerce global, la marge d'erreur n'est pas grande lorsque la période écoulée depuis l'année de base n'est pas longue.

Au fur et à mesure que s'allonge le laps de temps écoulé depuis l'année de base, la comparaison perd de sa signification. L'insertion dans la classification d'articles qui n'y figuraient pas l'année de base, l'importance variable d'articles anciennement énumérés, la grande variation en espèce et qualité d'autres produits qui toutefois ne subissent aucune modification quant à leur désignation, ou enfin, les modifications apportées aux méthodes statistiques peuvent influencer beaucoup les résultats de la réévaluation.

PREFACE

The Annual Report of the Trade of Canada for 1943 is published in three Volumes. Volumes II and III were not published for 1942 but statistics for that year are included in the 1943 edition.

Volume I contains summary tables, historical tables, and Canadian trade with each country by principal commodities. Table 36 appears for the first time while table 27 has been re-arranged.

Volume II contains exports by commodities and countries.

Volume III contains imports by commodities and countries. Free Imports, Dutiable Imports, and Customs Duties collected for 1942, not previously published, are included in this volume.

The Report was compiled in the External Trade Branch of the Bureau under the direction of Mr. L. A. Kane, Chief.

S. A. CUDMORE,
Dominion Statistician.

PRÉFACE

Le Rapport Annuel du Commerce du Canada pour 1943 paraît en trois volumes. Les volumes II et III n'ont pas été publiés pour 1942, mais les statistiques de l'année ont été incorporées dans l'édition de 1943.

Le volume I contient des tableaux sommaires, des tableaux historiques, et le commerce canadien avec chaque pays par principales denrées. Le tableau 36 paraît pour la première fois et le tableau 27 a été remodelé.

Le volume II donne les exportations par denrées et par pays.

Le volume III donne les importations par denrées et par pays. Les importations en franchise, les importations imposables et les droits de douanes perçus en 1942, pas publiés antérieurement, sont inclus dans ce volume.

Le Rapport a été compilé par la Branche du Commerce Extérieur du Bureau sous la direction de M. L. A. Kane, chef.

S. A. CUDMORE,
Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,
OTTAWA, le 1er septembre 1944.

EXPLANATORY NOTES

1. In all the tables of imports and exports in this Report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Washing machines and parts" and "Internal combustion engines and parts", etc., etc., which show both quantities and values. In the item "Washing machines and parts" the quantity represents the number of "Complete washing machines" only, while the value represents not only the value of the specified number of complete washing machines but also the value of all kinds of "Parts" of washing machines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. Under the main provisions of the law, the value of merchandise imported into Canada is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to Canada; but the value shall not be less than the price to jobbers and wholesalers generally, nor less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (See Sections 35 to 45 of the Customs Act.)

7. For Customs entry purposes, the value of the imports, which is in the currency of the country from which goods are imported, is converted to Canadian dollars at authorized exchange ratios. (See Section 55 of the Customs Act and Orders in Council respecting currency valuations.)

8. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

9. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

10. "Exports of Foreign Produce" consist of "Imports entered for Consumption" (see no. 5 above), which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

11. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

12. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from Canada are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.

13. *Ports*.—The Table of the Trade of Canada, by Ports and Provinces, shows that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for home consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

14. The initials "N.O.P." mean "not otherwise provided for".

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation), subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, réipients, etc. n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression «ton» signifie 2,000 livres et «cwt.» (ou quintal) 100 livres avoirdupois. Lorsqu'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

4. Dans ce rapport on trouve des item comme «lessiveuses et pièces» et «moteurs à combustion interne et leurs pièces de rechange», etc., etc., montrant les quantités et les valeurs. Dans le cas de «lessiveuses et pièces» la quantité représente le nombre de «lessiveuses complètes» seulement, et la valeur représente non seulement celle des lessiveuses complètes mais aussi celle de toutes les «parties» ou «pièces» de lessiveuses; c'est pourquoi, dans cet item et autres semblables, il est impossible d'établir la valeur moyenne par unité.

5. «Importations» signifie «importations entrées pour la consommation». «Entrées pour la consommation» n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie imposable de ces marchandises.

6. Dans l'esprit de la loi, la valeur des marchandises importées au Canada est leur valeur raisonnable au prix courant là où elles sont vendues pour la consommation locale sur les principaux marchés du pays d'où, à la même époque, elles sont expédiées directement au Canada; mais la valeur ne doit pas être inférieure au prix coté généralement aux marchands de gros, ni inférieure au coût réel de production à la date de l'expédition, plus une marge raisonnable pour frais de vente et profits. (Voir articles 35 à 45 de la loi des douanes.)

7. Pour les entrées des Douanes, la valeur des importations, exprimée en monnaie du pays d'où les marchandises proviennent, est convertie en dollars canadiens au taux autorisé du change. (Voir article 55 de la loi des douanes et arrêtés en Conseil sur l'évaluation des devises étrangères.)

8. Les «exportations de produits canadiens» comprennent non seulement les articles d'origine purement canadienne, mais aussi les articles importés d'origine étrangère qui ont été modifiés dans leur forme ou augmentés en valeur par une plus ample transformation au Canada, comme le sucre raffiné après avoir été importé à l'état brut, les articles fabriqués avec du caoutchouc brut importé.

9. La valeur des «exportations de produits canadiens» est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais.

10. Les «exportations de produits étrangers» comprennent les «importations entrées pour la consommation» (voir le n° 5 ci-dessus) qui ont été exportées du Canada dans le même état qu'à leur entrée. La valeur est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais, quand les marchandises sont exportées du Canada.

11. Les importations au Canada sont attribuées aux pays d'où elles ont été consignées au Canada. Les pays de consignment sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inévitables. Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignment. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent ces importations comme venant du Royaume-Uni.

12. Les exportations du Canada sont attribuées au pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays de consignment est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inévitables.

13. *Ports.*—Le tableau du commerce du Canada, par port et province, montre les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation de la province où est situé le port, ou que les marchandises exportées sont produites par la province où est situé le port de sortie.

14. Les initiales «n.a.é.» signifient «non autrement énuméré».

GOLD IN CANADIAN TRADE STATISTICS

The publication of statistics showing the gross imports and exports of gold has been temporarily suspended as from September, 1939. Statistics for periods prior to this time have been accordingly revised to exclude all gold formerly included in the total of merchandise exports.

Statistics showing the net exports of non-monetary gold, including changes in stocks held under earmark, are published as a supplement to the trade figures, and are given below.

Exports of gold in Canadian trade statistics were distinguished in previous reports as between monetary and non-monetary. Monetary gold exports were described as those which entailed a reduction in the Dominion's monetary gold stocks. All other gold exported (classed as non-monetary) were shown as merchandise, and included with the total merchandise exports.

The fact that gold is a money metal gives it peculiar attributes which distinguish it from other commodities in trade. In particular, the movement of gold in international trade is determined almost exclusively by monetary factors. The amount of exports may fluctuate widely from month to month owing to other than ordinary trade or commercial considerations. In addition, gold is generally acceptable. It does not have to surmount tariff barriers and is normally assured a market at a relatively fixed price. For these reasons, provision was made in previous trade reports for a supplementary table showing exports from Canada excluding all gold.

It is further to be noted that gold does not move in international trade in any direct or normal relation to sales and purchases. It may be bought or sold abroad without moving in or out across the frontier, the sales or purchases in such cases being recognized by simply setting aside or "earmarking" the gold in the vaults of the central bank. Trade statistics deal only with physical movements, sales or purchases of gold which do not involve an actual movement being more properly regarded as an "invisible item" and taken care of in the "International Balance of Payments" statements. Changes in the Bank of Canada's stock of gold under earmark do not enter, therefore, into the trade statistics.

L'OR DANS LES STATISTIQUES DU COMMERCE CANADIEN

La publication des statistiques relatives aux importations et exportations brutes d'or a été temporairement suspendue depuis septembre 1939. Les statistiques pour les périodes antérieures à cette date ont été révisées en conséquence, de manière à exclure tout l'or qui entraînait auparavant dans le total des exportations de marchandises.

Les statistiques montrant les exportations nettes d'or non monétaire, y compris les changements dans les stocks affectés, sont publiées comme supplément aux chiffres sur le commerce et sont données ci-dessous.

Dans les rapports précédents les exportations d'or dans les statistiques du commerce canadien comprenaient l'or monétaire et l'or non monétaire. Les exportations d'or monétaire y étaient décrites comme celles qui entraînent une diminution des stocks d'or monétaire du Dominion. Toutes les autres exportations d'or (classifiées comme non monétaire) étaient regardées comme marchandises et comprises dans les exportations globales de marchandises.

Le fait que l'or est un métal-monnaie lui donne des attributs spéciaux qui le distinguent des autres denrées dans le commerce. En particulier le mouvement de l'or dans le commerce international est déterminé presque exclusivement par des facteurs monétaires. Le volume des exportations peut largement fluctuer d'un mois à l'autre à cause de considérations autres que celles de l'échange et du commerce ordinaires. En outre, l'or est généralement acceptable. Il n'a pas à surmonter les barrières tarifaires, et un marché lui est normalement assuré à un prix relativement fixe. Pour ces raisons les rapports antérieurs sur le commerce fournissaient un tableau supplémentaire sur les exportations canadiennes, à l'exclusion de l'or.

De plus, il faut observer que dans le commerce international l'or ne se déplace pas en relation directe ou normale avec les ventes et les achats. Il peut s'acheter ou se vendre à l'étranger sans entrée ou sortie à la frontière; en ces cas, les ventes ou les achats sont reconnus en mettant simplement de côté ou en «affectant» l'or dans les chambres fortes de la banque centrale. Les statistiques du commerce n'ont trait qu'aux mouvements physiques; les ventes et les achats d'or qui ne comportent pas un mouvement réel sont plus proprement regardés comme un «item invisible», et ils prennent place dans les états de la «Balance des paiements internationaux». Les changements dans les stocks d'or affecté de la Banque du Canada ne paraissent donc pas dans les statistiques du commerce.

* In this classification the expression "Canadian Farm Products" refers, in the case of Exports, to commodities actually produced in their original form on Canadian farms. In the case of Imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both Imports and Exports, materials or commodities such as Canada does not produce, e.g.—cane sugar, tea, rubber, cotton, silk, etc.

COMPARISON OF THE VALUE AND VOLUME OF IMPORTS AND EXPORTS

Changes in the value of foreign trade may be caused by variations in the quantity or volume of goods imported or exported, by fluctuations in price, or by a combination of these factors. If prices should happen to fall between two given dates when the aggregate nominal values of imports and exports decline, or if they should happen to rise when the aggregate nominal values increase, it is clearly possible that there may be no corresponding decline or increase in the amounts of goods imported or exported. Quantities may even increase when nominal values decline, or may fall off when nominal values rise. It is necessary, therefore, in comparing the physical volume of imports and exports at different periods, to make allowance for fluctuations in prices. The table on the following page presents a comparison of the physical volume of imports and exports, with the nominal or declared values.

The indexes of value and volume have been re-calculated on a five-year base (1935-1939=100) making them uniform in respect of base period with the other indexes of the Bureau.

To eliminate the factor of price changes and show the variations in the volume of imports and exports over the period, average values were ascertained for a base year in respect to each item imported or exported for which statistics of quantity as well as value were available, and the quantities for the same items in each year were revalued at the average values of the base year. In the case of a number of items, such as certain textile products, books and printed matter, machinery, automobile parts, toys and many miscellaneous goods for which quantities are not available, and other items for which quantities are available, but which have been rendered incomparable for the period under review by changes in tariff schedules and statistical classification, it was assumed that the value moved proportionately in the same direction, as in the case of related commodities. In other cases, even where the quantities are given, the items are so small in amount that they have been merged with the items for which quantities are not given at the end of each sub-group. The values of the miscellaneous classes at the end of each main group, e.g., "Other Agricultural and Vegetable Products", "Other Fibres and Textiles", etc., are assumed to have moved in harmony with the average of the rest of the entire group to which they refer, or in the case of "Other Miscellaneous Commodities", in proportion to the average of the preceding eight groups. The assumption that the unspecified items move in harmony with the groups to which they are attached may not always be valid and the results must not be regarded as of great precision, but since the value of goods for which quantity statistics are not available and those not comparable over a short period is small in comparison to the total trade, the amount of error introduced on their account is not considerable when the interval from the base year is not long.

As the time interval from a given base year increases, the comparison tends to lose its significance. New items may be added to the classification that have no counterpart in the base year, the relative importance of old items may vary, and others may vary considerably in kind or quality but not in name, or a change in the method of collecting and recording the statistics may materially alter the results of the revaluation.

COMPARAISON ENTRE LA VALEUR ET LE VOLUME DES IMPORTATIONS ET EXPORTATIONS

Les changements en valeur du commerce étranger peuvent être causés par les fluctuations du volume des marchandises importées ou exportées, par les variations des prix ou encore par ces deux facteurs combinés. S'il arrive, par exemple, que les prix baissent entre deux dates spécifiées lors d'une période accusant un fléchissement de la valeur globale des importations et exportations, ou bien qu'ils montent lorsqu'on enregistre un accroissement de la valeur globale, il ne s'ensuit pas nécessairement que le volume des importations et exportations doive subir de diminution ou d'augmentation correspondantes. Il peut même arriver que le volume augmente lorsque la valeur nominale baisse et qu'il baisse lorsque celle-ci augmente. Il faut donc tenir compte des fluctuations des prix lorsqu'il s'agit d'établir une comparaison entre le volume physique des importations et celui des exportations entre deux périodes. Le tableau qui suit donne une comparaison du volume effectif des importations et exportations juxtaposé aux valeurs nominales ou déclarées.

Les indices de valeur et de volume ont été recalculés sur une base de cinq ans (1935-1939 = 100) de façon à les rendre conformes, en ce qui concerne la période fondamentale, aux autres indices du Bureau.

Afin d'éliminer le facteur de la fluctuation des prix et de donner les variations en volume des importations et exportations au cours de cette période, on a calculé les valeurs moyennes pour une année de base de chaque article importé ou exporté sur lequel on disposait de données statistiques, tant en volume qu'en valeur, et révalué le volume des mêmes articles pour chacune des autres années aux valeurs moyennes de l'année de base. En ce qui concerne quelques articles, comme par exemple certains textiles, les livres et les imprimés, les machines, les pièces de rechange d'automobile, les jouets et bon nombre de divers articles sur lesquels on ne possède aucune donnée en volume, ainsi que certains autres articles dont le volume, bien que connu, ne se prête pas toutefois à des comparaisons pour la période qui nous intéresse à cause des modifications apportées aux cédules tarifaires et aux classifications statistiques, on s'est guidé sur l'hypothèse que ces valeurs ont suivi proportionnellement les mêmes tendances que celles des produits connexes. Dans d'autres cas, même où l'on dispose de la quantité, les chiffres sont si faibles qu'on les a inclus avec les autres entrées qui ne sont pas spécifiées nommément à la fin de chaque sous-groupe. Quant aux valeurs des groupes divers paraissant à la fin de chaque groupe principal, comme par exemple «autres produits agricoles et substances végétales», «autres fibres et textiles», etc., on présume qu'elles ont suivi les mêmes tendances que la moyenne du groupe entier sous lequel ils sont classifiés, ou bien, en ce qui concerne la classification «autres denrées diverses», qu'elles ont eu les mêmes tendances que la moyenne des huit groupes précédents. L'hypothèse que les articles non spécifiés suivent les mêmes tendances que les groupes dont ils font partie n'est sans doute pas toujours juste, les données ne pouvant ainsi être considérées comme des plus précises; mais comme la valeur des produits dont on ignore le volume, ou ceux qui ne se prêtent pas à des comparaisons pour un court laps de temps, n'est que minime comparativement au commerce global, la marge d'erreur n'est pas grande lorsque la période écoulée depuis l'année de base n'est pas longue.

Au fur et à mesure que s'allonge le laps de temps écoulé depuis l'année de base, la comparaison perd de sa signification. L'insertion dans la classification d'articles qui n'y figuraient pas l'année de base, l'importance variable d'articles anciennement énumérés, la grande variation en espèce et qualité d'autres produits qui toutefois ne subissent aucune modification quant à leur désignation, ou enfin, les modifications apportées aux méthodes statistiques peuvent influencer beaucoup les résultats de la réévaluation.

I REFACE

The Annual Report of the Trade of Canada for 1944 is published in three Volumes.

Volume I contains summary tables, historical tables, and Canadian trade with each country by principal commodities.

Volume II contains exports by commodities and countries.

Volume III contains imports by commodities and countries.

The Report was compiled in the External Trade Branch of the Bureau under the direction of Mr. L. A. Kane, Chief.

S. A. CUDMORE,
Dominion Statistician.

DOMINION BUREAU OF STATISTICS,
OTTAWA, July 1, 1945.

PRÉFACE

Le Rapport Annuel du Commerce du Canada pour 1944 paraît en trois volumes.

Le volume I contient des tableaux sommaires, des tableaux historiques, et le commerce canadien avec chaque pays par principales denrées.

Le volume II donne les exportations par denrées et par pays.

Le volume III donne les importations par denrées et par pays.

Le Rapport a été compilé par la Branche du Commerce Extérieur du Bureau sous la direction de M. L. A. Kane, chef.

S. A. CUDMORE,
Statisticien du Dominion.

BUREAU FÉDÉRAL DE LA STATISTIQUE,
OTTAWA, le 1er juillet 1945

EXPLANATORY NOTES

1. In all the tables of imports and exports in this Report, the quantities and values are based upon the declarations of importers (import entries) and of exporters (export entries), as subsequently checked by Customs officials.

2. Weight, where shown, is the net weight of the goods, that is, it excludes the weight of the covers or receptacles, except in cases of certain goods, as provided in the Customs tariff.

3. The expression "ton" means 2,000 pounds, and "cwt." 100 pounds, avoirdupois. Where other units of quantity are used, Imperial standards apply.

4. In this Report are trade items such as "Washing machines and parts" and "Internal combustion engines and parts", etc., etc., which show both quantities and values. In the item "Washing machines and parts" the quantity represents the number of "Complete washing machines" only, while the value represents not only the value of the specified number of complete washing machines but also the value of all kinds of "Parts" of washing machines; therefore, in this item, and in similar items, the average value per unit cannot be ascertained.

5. "Imports" means "Imports entered for Consumption". "Entered for Consumption" does not imply that the goods have been actually consumed in Canada, but that they have passed into the custody of the importer and that duty has been paid on the dutiable portion.

6. Under the main provisions of the law, the value of merchandise imported into Canada is the fair market value or price thereof when sold for home consumption in the principal markets of the country from which, and at the same time when, said merchandise was exported directly to Canada; but the value shall not be less than the actual cost of production at the time of shipment plus a reasonable advance for cost of selling, and profit. (See Sections 35 to 45 of the Customs Act.)

7. For Customs entry purposes, the value of the imports, which is in the currency of the country from which goods are imported, is converted to Canadian dollars at authorized exchange ratios. (See Section 55 of the Customs Act and Orders in Council respecting currency valuations.)

8. "Exports of Canadian Produce" include not only articles of purely Canadian origin but also imported articles of foreign origin which have been changed in form or enhanced in value by further manufacture in Canada, such as sugar refined from imported raw sugar, and rubber goods made from imported unmanufactured rubber.

9. The value of "Exports of Canadian Produce" is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges.

10. "Exports of Foreign Produce" consist of "Imports entered for Consumption" (see no. 5 above), which have been exported from Canada in the same condition as when imported. The value is the actual amount received in terms of Canadian dollars exclusive of freight, insurance, handling and other charges, when exported from Canada.

11. Imports into Canada are classified as received from the countries whence they were consigned to Canada. The countries of consignment are the countries from which the goods have come, without interruption of transit, except in the course of transshipment or transfer from one conveyance to another. The countries whence goods are consigned are not necessarily the countries of actual origin, since goods produced in one country may be purchased by a firm in another country and thence despatched, after a longer or shorter interval, to Canada. In such cases the second country would be the country of consignment to which the goods would be credited. An example is the case of tea grown in the Orient but purchased in the bonded market in London, England; Canadian statistics record such imports as coming from the United Kingdom.

12. Exports from Canada are credited to the country to which they are consigned, whether that country possesses a seaboard or not. The country of consignment is the country to which goods exported from Canada are intended to pass, without interruption of transit, except in the course of transshipment or transfer from one means of conveyance to another.

13. *Ports*.—The Table of the Trade of Canada, by Ports and Provinces, shows that merchandise was imported or exported at these ports; but this does not imply that goods imported at any port were for home consumption there or even in the province in which the port is situated, neither does it imply that goods exported at any port originated there or even in the province in which the port is situated.

14. The initials "N.O.P." mean "not otherwise provided for".

NOTES EXPLICATIVES

1. Toutes les indications de volume et de valeur que l'on trouvera dans cet ouvrage sont basées sur les déclarations des importateurs et des exportateurs (documents d'importation et d'exportation), subséquemment vérifiées par les fonctionnaires des douanes.

2. Partout où il est question de poids, il s'agit du poids net des marchandises, c'est-à-dire que le poids des emballages, récipients, etc. n'y est pas compris, sauf certaines exceptions énumérées au tarif des douanes.

3. L'expression «ton» signifie 2,000 livres et «cwt.» (ou quintal) 100 livres avoirdupois. Lorsqu'on se sert d'autres unités, il convient d'adopter le standard impérial de poids et mesures.

4. Dans ce rapport on trouve des item comme «lessiveuses et pièces» et «moteurs à combustion interne et leurs pièces de rechange», etc., etc., montrant les quantités et les valeurs. Dans le cas de «lessiveuses et pièces» la quantité représente le nombre de «lessiveuses complètes» seulement, et la valeur représente non seulement celle des lessiveuses complètes mais aussi celle de toutes les «parties» ou «pièces» de lessiveuses; c'est pourquoi, dans cet item et autres semblables, il est impossible d'établir la valeur moyenne par unité.

5. «Importations» signifie «importations entrées pour la consommation». «Entrées pour la consommation» n'implique pas que ces marchandises sont nécessairement consommées au Canada, mais qu'elles ont été livrées à l'importateur qui a payé les droits sur telle partie imposable de ces marchandises.

6. Dans l'esprit de la loi, la valeur des marchandises importées au Canada est leur valeur raisonnable au prix courant là où elles sont vendues pour la consommation locale sur les principaux marchés du pays d'où, à la même époque, elles sont expédiées directement au Canada; mais la valeur ne doit pas être inférieure au coût réel de production à la date de l'expédition, plus une marge raisonnable pour frais de vente et profits. (Voir articles 35 à 45 de la loi des douanes.)

7. Pour les entrées des Douanes, la valeur des importations, exprimée en monnaie du pays d'où les marchandises proviennent, est convertie en dollars canadiens au taux autorisé du change. (Voir article 55 de la loi des douanes et arrêtés en Conseil sur l'évaluation des devises étrangères.)

8. Les «exportations de produits canadiens» comprennent non seulement les articles d'origine purement canadienne, mais aussi les articles importés d'origine étrangère qui ont été modifiés dans leur forme ou augmentés en valeur par une plus ample transformation au Canada, comme le sucre raffiné après avoir été importé à l'état brut, les articles fabriqués avec du caoutchouc brut importé.

9. La valeur des «exportations de produits canadiens» est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais.

10. Les «exportations de produits étrangers» comprennent les «importations entrées pour la consommation» (voir le n° 5 ci-dessus) qui ont été exportées du Canada dans le même état qu'à leur entrée. La valeur est le montant réel reçu, exprimé en dollars canadiens, à l'exclusion du fret, des assurances, de la manutention et des autres frais, quand les marchandises sont exportées du Canada.

11. Les importations au Canada sont attribuées aux pays d'où elles ont été consignées au Canada.* Les pays de consignment sont les pays d'où viennent les marchandises, sans autre interruption de transit que les transbordements inévitables. Les pays d'où les marchandises sont consignées ne sont pas nécessairement les pays d'origine, car les marchandises produites dans un certain pays peuvent avoir été achetées par une firme d'un autre pays, d'où elles peuvent être expédiées au Canada après une période plus ou moins longue. Dans ce cas, l'attribution de ces marchandises est faite au second pays, considéré comme pays de consignment. Il en sera ainsi, par exemple, du thé récolté en Orient mais acheté sur le marché de Londres, Angleterre; les statistiques canadiennes considèrent ces importations comme venant du Royaume-Uni.

12. Les exportations du Canada sont attribuées au pays où elles sont consignées, même si ce pays ne possède pas de port de mer. Le pays de consignment est le pays que les marchandises exportées du Canada doivent finalement atteindre sans interruption de transit autre que les transbordements inévitables.

13. *Ports.*—Le tableau du commerce du Canada, par port et province, montre les marchandises importées ou exportées par ces ports, mais il n'en faut pas conclure que les marchandises importées par un port quelconque sont pour la consommation de la province où est situé le port, ou que les marchandises exportées sont produites par la province où est situé le port de sortie.

14. Les initiales «n.a.é.» signifient «non autrement énuméré».

GOLD IN CANADIAN TRADE STATISTICS

The publication of statistics showing the gross imports and exports of gold has been temporarily suspended as from September, 1939. Statistics for periods prior to this time have been accordingly revised to exclude all gold formerly included in the total of merchandise exports.

Statistics showing the net exports of non-monetary gold, including changes in stocks held under earmark, are published as a supplement to the trade figures, and are given below.

Exports of gold in Canadian trade statistics were distinguished in previous reports as between monetary and non-monetary. Monetary gold exports were described as those which entailed a reduction in the Dominion's monetary gold stocks. All other gold exported (classed as non-monetary) were shown as merchandise, and included with the total merchandise exports.

The fact that gold is a money metal gives it peculiar attributes which distinguish it from other commodities in trade. In particular, the movement of gold in international trade is determined almost exclusively by monetary factors. The amount of exports may fluctuate widely from month to month owing to other than ordinary trade or commercial considerations. In addition, gold is generally acceptable. It does not have to surmount tariff barriers and is normally assured a market at a relatively fixed price. For these reasons, provision was made in previous trade reports for a supplementary table showing exports from Canada excluding all gold.

It is further to be noted that gold does not move in international trade in any direct or normal relation to sales and purchases. It may be bought or sold abroad without moving in or out across the frontier, the sales or purchases in such cases being recognized by simply setting aside or "earmarking" the gold in the vaults of the central bank. Trade statistics deal only with physical movements, sales or purchases of gold which do not involve an actual movement being more properly regarded as an "invisible item" and taken care of in the "International Balance of Payments" statements. Changes in the Bank of Canada's stock of gold under earmark do not enter, therefore, into the trade statistics.

L'OR DANS LES STATISTIQUES DU COMMERCE CANADIEN

La publication des statistiques relatives aux importations et exportations brutes d'or a été temporairement suspendue depuis septembre 1939. Les statistiques pour les périodes antérieures à cette date ont été révisées en conséquence, de manière à exclure tout l'or qui entraînait auparavant dans le total des exportations de marchandises.

Les statistiques montrant les exportations nettes d'or non monétaire, y compris les changements dans les stocks affectés, sont publiées comme supplément aux chiffres sur le commerce et sont données ci-dessous.

Dans les rapports précédents les exportations d'or dans les statistiques du commerce canadien comprenaient l'or monétaire et l'or non monétaire. Les exportations d'or monétaire y étaient décrites comme celles qui entraînent une diminution des stocks d'or monétaire du Dominion. Toutes les autres exportations d'or (classifiées comme non monétaire) étaient regardées comme marchandises et comprises dans les exportations globales de marchandises.

Le fait que l'or est un métal-monnaie lui donne des attributs spéciaux qui le distinguent des autres denrées dans le commerce. En particulier le mouvement de l'or dans le commerce international est déterminé presque exclusivement par des facteurs monétaires. Le volume des exportations peut largement fluctuer d'un mois à l'autre à cause de considérations autres que celles de l'échange et du commerce ordinaires. En outre, l'or est généralement acceptable. Il n'a pas à surmonter les barrières tarifaires, et un marché lui est normalement assuré à un prix relativement fixe. Pour ces raisons les rapports antérieurs sur le commerce fournissaient un tableau supplémentaire sur les exportations canadiennes, à l'exclusion de l'or.

De plus, il faut observer que dans le commerce international l'or ne se déplace pas en relation directe ou normale avec les ventes et les achats. Il peut s'acheter ou se vendre à l'étranger sans entrée ou sortie à la frontière; en ces cas, les ventes ou les achats sont reconnus en mettant simplement de côté ou en «affectant» l'or dans les chambres fortes de la banque centrale. Les statistiques du commerce n'ont trait qu'aux mouvements physiques; les ventes et les achats d'or qui ne comportent pas un mouvement réel sont plus proprement regardés comme un «item invisible», et ils prennent place dans les états de la «Balance des paiements internationaux». Les changements dans les stocks d'or affecté de la Banque du Canada ne paraissent donc pas dans les statistiques du commerce.

* In this classification the expression "Canadian Farm Products" refers, in the case of Exports, to commodities actually produced in their original form on Canadian farms. In the case of Imports, it covers all commodities of which the basic raw materials are such as Canadian farms produce. "Foreign Farm Products" covers, in both Imports and Exports, materials or commodities such as Canada does not produce, e.g.—cane sugar, tea, rubber, cotton, silk, etc.

COMPARISON OF THE VALUE AND VOLUME OF IMPORTS AND EXPORTS

Changes in the value of foreign trade may be caused by variations in the quantity or volume of goods imported or exported, by fluctuations in price, or by a combination of these factors. If prices should happen to fall between two given dates when the aggregate nominal values of imports and exports decline, or if they should happen to rise when the aggregate nominal values increase, it is clearly possible that there may be no corresponding decline or increase in the amounts of goods imported or exported. Quantities may even increase when nominal values decline, or may fall off when nominal values rise. It is necessary, therefore, in comparing the physical volume of imports and exports at different periods, to make allowance for fluctuations in prices. The table on the following page presents a comparison of the physical volume of imports and exports, with the nominal or declared values.

The indexes of value and volume have been re-calculated on a five-year base (1935-1939=100) making them uniform in respect of base period with the other indexes of the Bureau.

To eliminate the factor of price changes and show the variations in the volume of imports and exports over the period, average values were ascertained for a base year in respect to each item imported or exported for which statistics of quantity as well as value were available, and the quantities for the same items in each year were revalued at the average values of the base year. In the case of a number of items, such as certain textile products, books and printed matter, machinery, automobile parts, toys and many miscellaneous goods for which quantities are not available, and other items for which quantities are available, but which have been rendered incomparable for the period under review by changes in tariff schedules and statistical classification, it was assumed that the value moved proportionately in the same direction, as in the case of related commodities. In other cases, even where the quantities are given, the items are so small in amount that they have been merged with the items for which quantities are not given at the end of each sub-group. The values of the miscellaneous classes at the end of each main group, e.g., "Other Agricultural and Vegetable Products", "Other Fibres and Textiles", etc., are assumed to have moved in harmony with the average of the rest of the entire group to which they refer, or in the case of "Other Miscellaneous Commodities", in proportion to the average of the preceding eight groups. The assumption that the unspecified items move in harmony with the groups to which they are attached may not always be valid and the results must not be regarded as of great precision, but since the value of goods for which quantity statistics are not available and those not comparable over a short period is small in comparison to the total trade, the amount of error introduced on their account is not considerable when the interval from the base year is not long.

As the time interval from a given base year increases, the comparison tends to lose its significance. New items may be added to the classification that have no counterpart in the base year, the relative importance of old items may vary, and others may vary considerably in kind or quality but not in name, or a change in the method of collecting and recording the statistics may materially alter the results of the revaluation.

COMPARAISON ENTRE LA VALEUR ET LE VOLUME DES IMPORTATIONS ET EXPORTATIONS

Les changements en valeur du commerce étranger peuvent être causés par les fluctuations du volume des marchandises importées ou exportées, par les variations des prix ou encore par ces deux facteurs combinés. S'il arrive, par exemple, que les prix baissent entre deux dates spécifiées lors d'une période accusant un fléchissement de la valeur globale des importations et exportations, ou bien qu'ils montent lorsqu'on enregistre un accroissement de la valeur globale, il ne s'ensuit pas nécessairement que le volume des importations et exportations doive subir de diminution ou d'augmentation correspondantes. Il peut même arriver que le volume augmente lorsque la valeur nominale baisse et qu'il baisse lorsque celle-ci augmente. Il faut donc tenir compte des fluctuations des prix lorsqu'il s'agit d'établir une comparaison entre le volume physique des importations et celui des exportations entre deux périodes. Le tableau qui suit donne une comparaison du volume effectif des importations et exportations juxtaposé aux valeurs nominales ou déclarées.

Les indices de valeur et de volume ont été recalculés sur une base de cinq ans (1935-1939 = 100) de façon à les rendre conformes, en ce qui concerne la période fondamentale, aux autres indices du Bureau.

Afin d'éliminer le facteur de la fluctuation des prix et de donner les variations en volume des importations et exportations au cours de cette période, on a calculé les valeurs moyennes pour une année de base de chaque article importé ou exporté sur lequel on disposait de données statistiques, tant en volume qu'en valeur, et révalué le volume des mêmes articles pour chacune des autres années aux valeurs moyennes de l'année de base. En ce qui concerne quelques articles, comme par exemple certains textiles, les livres et les imprimés, les machines, les pièces de rechange d'automobile, les jouets et bon nombre de divers articles sur lesquels on ne possède aucune donnée en volume, ainsi que certains autres articles dont le volume, bien que connu, ne se prête pas toutefois à des comparaisons pour la période qui nous intéresse à cause des modifications apportées aux cédules tarifaires et aux classifications statistiques, on s'est guidé sur l'hypothèse que ces valeurs ont suivi proportionnellement les mêmes tendances que celles des produits connexes. Dans d'autres cas, même où l'on dispose de la quantité, les chiffres sont si faibles qu'on les a inclus avec les autres entrées qui ne sont pas spécifiées nommément à la fin de chaque sous-groupe. Quant aux valeurs des groupes divers paraissant à la fin de chaque groupe principal, comme par exemple «autres produits agricoles et substances végétales», «autres fibres et textiles», etc., on présume qu'elles ont suivi les mêmes tendances que la moyenne du groupe entier sous lequel ils sont classifiés, ou bien, en ce qui concerne la classification «autres denrées diverses», qu'elles ont eu les mêmes tendances que la moyenne des huit groupes précédents. L'hypothèse que les articles non spécifiés suivent les mêmes tendances que les groupes dont ils font partie n'est sans doute pas toujours juste, les données ne pouvant ainsi être considérées comme des plus précises; mais comme la valeur des produits dont on ignore le volume, ou ceux qui ne se prêtent pas à des comparaisons pour un court laps de temps, n'est que minime comparativement au commerce global, la marge d'erreur n'est pas grande lorsque la période écoulée depuis l'année de base n'est pas longue.

Au fur et à mesure que s'allonge le laps de temps écoulé depuis l'année de base, la comparaison perd de sa signification. L'insertion dans la classification d'articles qui n'y figuraient pas l'année de base, l'importance variable d'articles anciennement énumérés, la grande variation en espèce et qualité d'autres produits qui toutefois ne subissent aucune modification quant à leur désignation, ou enfin, les modifications apportées aux méthodes statistiques peuvent influencer beaucoup les résultats de la réévaluation.
